SharedGeo donates time, products, and services to the communities we serve. We provided infrastructure, support and mapping services to help the responses to the 2009 Red River Floods and 2010 Haiti Earthquake. We sponsor GIS learning and open source collaboration events. How can we help your community?

Projects

SharedGeo works on large and small projects creating solutions that help organizations be more efficient and effective in processing, using and serving geospatial data. We specialize in open source solutions using geospatial standards. We can even use a "Shared Funding" model to help get your project funded.

Products

SharedGeo is a national leader in providing U.S. National Grid (USNG) products that support the Emergency Services Sector. SharedGeo designed USNG Location Markers that are setting the standard in this area. If you need a one-function widget, a full-blown solution or an innovative product, SharedGeo can help.
